

Diamond Shaped Rubber Speed Hump ST-SH350

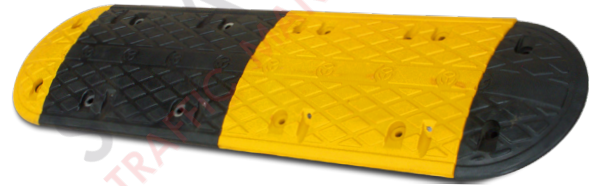

SecaTRAC Diamond Shape Rubber Humps are ideal for slowing vehicle speeds to a minimum at parking facilities, residential area and places that requires vehicle to slow down. With in-molded bright yellow tape and reflective beads, these highly visible devices will enhance visual for both driver and pedestrian in low light environment. Constructed from 100% recycled rubber, Diamond Shape Rubber Humps are preformed to ensure a smooth, safe ride.

Features :

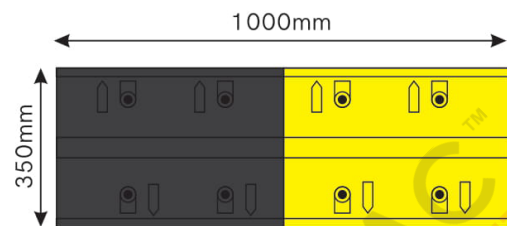

- Made from 100% recycled rubber, which is softer and more skid-resistant than the concrete, steel or plastic type speed hump.
- In-molded bright yellow tape (yellow intermediate piece, end cap only) with black intermediate piece are traditional caution/hazard color combination.
- In-molded reflective bead to enhance visibility at low light environment.
- Pre-drilled holes with steel washer for easy installation.
- Comes with end caps to protect hump ends as well as vehicles.
- Lightweight - can be installed on asphalt or concrete surface.
- Can be easily removed or relocated.
- Can be applied as temporary or permanent installation.
- Flexible design conforms to the contour of any road surface.
- Can be lined together to cover the width of any roadway.
- Resistant to moisture, oil & temperature variations.
- Not easy to warp, crack, chip or rot.

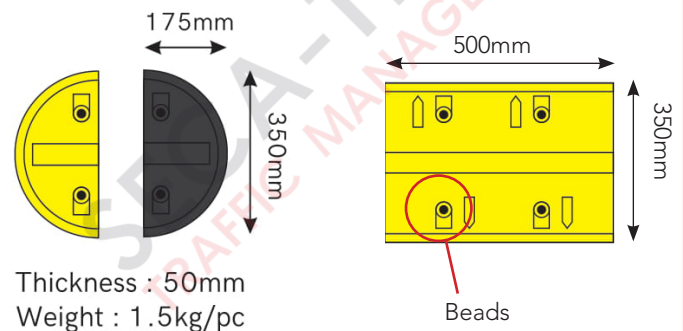

SPEED HUMP 350

Representation of Diamond Shaped Rubber Road Speed Hump SH350

Thickness : 50mm
Weight : 14kg /meter

Thickness : 50mm
Weight : 1.5kg/pc

Specification of Speed Hump SH350

Item	Speed Bump	Parking Curb Installation Method	Spikes
Parking Stop Material	Rubber	Tensile Strength	435 psi
Length	500 mm	Recycled Content (%)	100%
Thickness	50 mm	Cable Channel Width	No Cable Channel
Width	350 mm	Cable Channel Height	No Cable Channel
Color	Black/Yellow	Number of Holes	8 holes per meter
